

Something **has** to be metal to be magnetic.

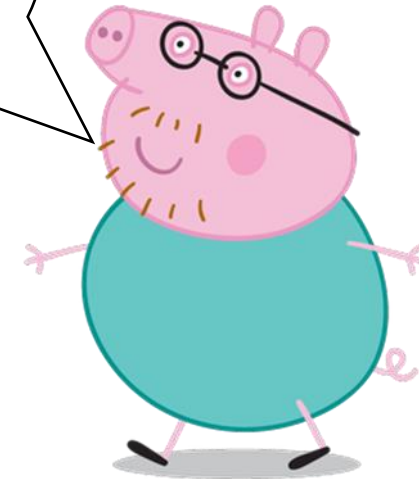

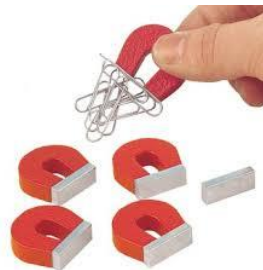

Magnets **stick** to magnetic materials, a bit like glue.

All magnets have two **ends**. The same ends do not like to be near each other!

Big magnets are always stronger than smaller magnets.

Now try to write your idea about magnets:

- Patrick is correct because: Can you write why Patrick is correct?
- Dora is correct because:
- Is Mrs Flintstone correct?
- Daddy Pig is correct because:
